Abstract

month = October

Write an abstract here.

1 Introduction

Introduction on the participation in the Shared Task on Sentiment Analysis and Swapping in Arabic Dialects (DialectSentEval) (Ezzini et al., 2026a), hosted with the Arabic Natural Language Processing Conference (ArabicNLP 2026)¹.

Subtask 1: Arabic Dialect Sentiment Analysis: A multi-class classification task focused on identifying the sentiment (positive, negative, or neutral) of texts written in various Arabic dialects. This subtask emphasizes the need for robust models that can handle the lexical and syntactic diversity of the Arab world.
